## Steps to create an .ipa file from Xcode

[Ref: <a href="https://stackoverflow.com/questions/5499125/how-to-create-ipa-file-using-xcode">https://stackoverflow.com/questions/5499125/how-to-create-ipa-file-using-xcode</a> & https://codewithchris.com/deploy-your-app-on-an-iphone/]

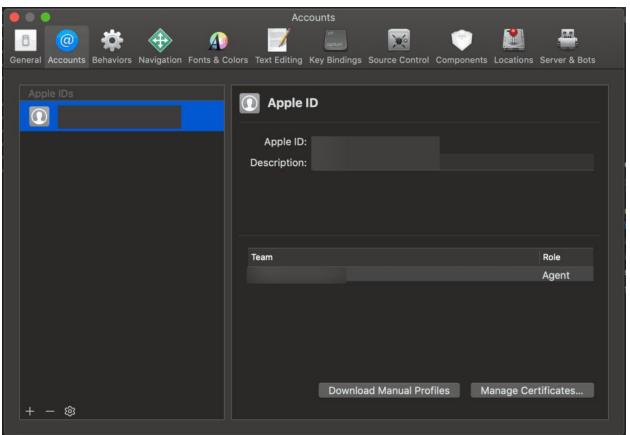

1. Connect your iphone/ipad/ios device to your Macbook

2. Add the apple id in the Preference -> Signing & Capabilities

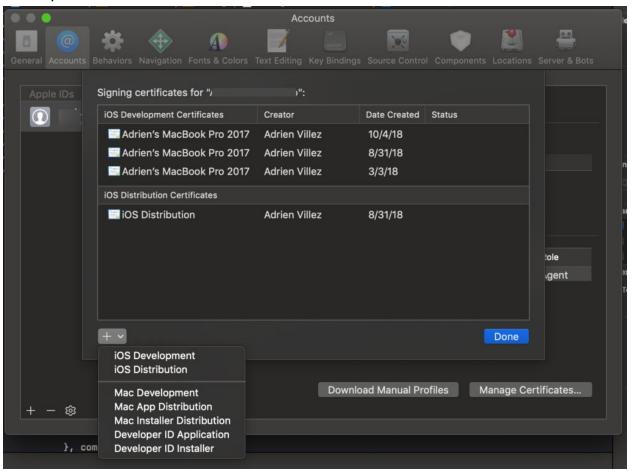

- 3. Click on Add an Account in Team
- 4. Then go to the "Accounts" tab. Fill in your Apple iOS developer account details here

5. Once you're signed in, click "Manage Certificate" and you'll get to this panel where you can see your existing certificates and provisioning profiles

6. If you click the "+" icon below the certificates pane, you can request a new iOS Development Certificate

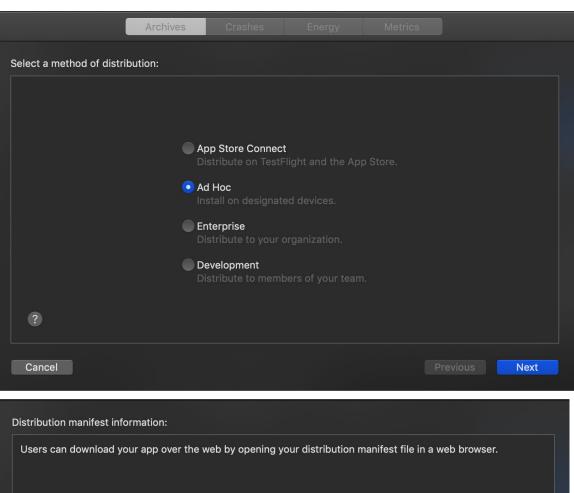

- 7. Go to Product -> Archive
- 8. Once the archive is finished, Go to Window -> Organizer
- 9. Then select your app archive from archives
- 10. Then click the "Distribute App" button on right panel

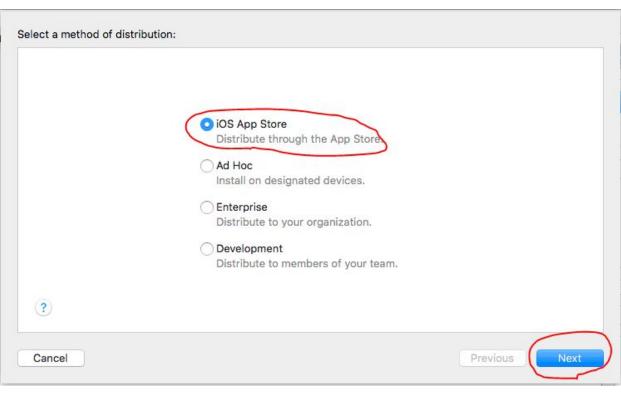

5. Then follow the below steps

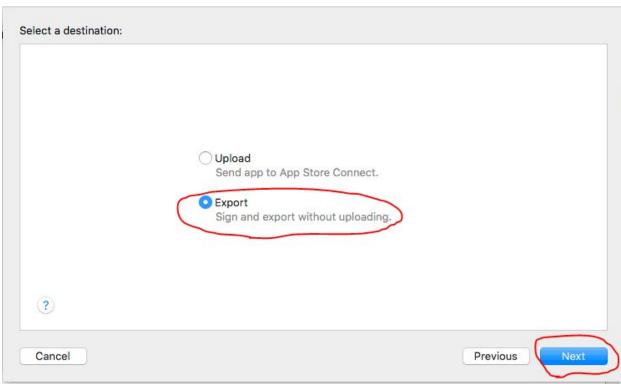

For designated device

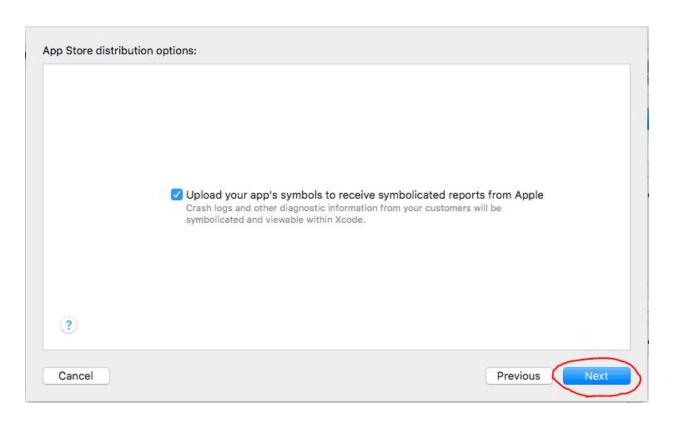

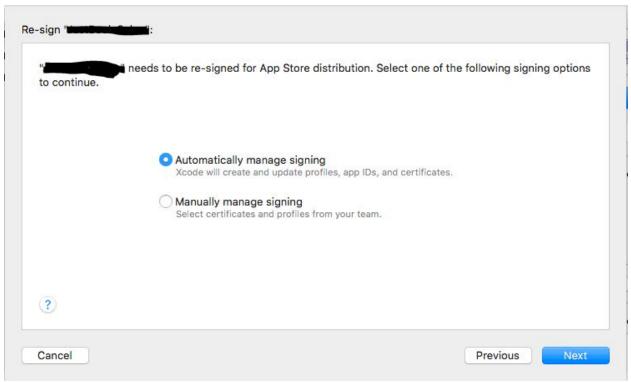

Jsers can download your app over	the web by opening your	distribution manifest file in	a web browser.	
Name:	Арр			
App URL:	https://www.google.com			
Display Image URL:	https://www.google.com			
Full Size Image URL:	https://www.google.com	A 512-by-512-pixel PNG imag the app in iTunes.	e that represents	
?				
Cancel			Previous	Next

For App store:

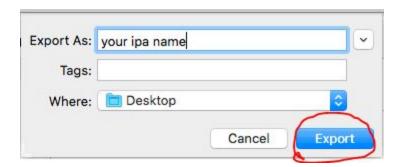

(E)	
	SUMMARY
	Team:
	Certificate: iOS Distribution
	Profile: None
	Symbols: Included
	Architectures: armv7 and arm64
	ENTITLEMENTS
	keychain-access-groups
	application-identifier
	aps-environment

## Finally export the file as <app-name>.ipa file

## Installing .ipa file from iTunes on Windows

- 1. Download & Install **iTunes** on Windows machine from Microsoft Store or internet
- 2. Once installed, connect the iOS device to Windows ma
